

Leads Engine Release 9.6

The Leads Engine 9.6 release is focused on expanding visibility into lead sources and areas served.

Source Manager

Source Manager is a new section of Leads Engine that displays all active source and form combinations for a company. This new section will be the home for our first source creation feature, Custom Lead Sources email parsing which is entering into Development next.

Bug Fixes

Issue: The "Listing details" section in the lead detail email is displayed when no listing details are available in Agent Generated Lead (AGL) Subsequent leads.

Fix: The label "Listing Details" will be displayed only when related information is available.

Issue: In the Agent Engagement Rule found in Business Manager, the default second and third intervals are populated after those intervals were deleted and the rule was saved.

Fix: The second and third intervals will no longer appear after they are removed and the rule is saved.
